

Baseball Players Performance

First version of the story is as follows:

https://public.tableau.com/views/BaseballplayerPerformance/BaseballPlayerPerformance?:embed=y&:display_count=yes

- **Summary:** brief description of the visualization and the main story or findings conveyed

Performance of the baseball Players is evaluated. Their Height and weight are considered if they have any effect on the general performance. Home runs and batting average was used to evaluate the performance. We see that height has no relation on the performance of baseball players.

- **Design:** explain any design choices you made including changes to the visualization after collecting feedback

On the single sheet height was used as color and different players are evaluated and the home run was used as different sizes.

- **Feedback:** feedback received from others from the first sketch to the final visualization

Waiting for feedback

- **Resources:** list of Web sites, books, forums, blog posts, GitHub repositories etc that you referred to or used in this submission (Add N/A if you did not use such resources).
